

Secure your organization according to GDPR, quick and easy

*In a connected world private, as well as public organizations,
need to communicate without infringing on their security.
Not just for the law, but for the citizens*

Secure your organization

SecureMailbox offers communication freedom without false trade-offs with usability and productivity. SecureMailbox is an integrated part of the Secure-Appbox Administration platform where organizations can share messages, files and application data according to Privacy by Design principles.

Deploy compliance and security policies

SecureMailbox is easy to set up and manage for both small as well as global organizations. In the administration console you can manage security and compliance policies, organize groups and select account types.

Send Options ▼

Select one or more options

- HIDE RECIPIENTS
- READ NOTIFICATION
- DELIVERY ALERT
- IDENTITY CONTROL
- BURN AFTER READING
- FOR YOUR EYES ONLY
- EXPIRATION DATE Set date

Close

Read notification
A text notification (SMS) will be sent to your mobile phone once the message has been opened by the recipient.

Delivery alert
A text message (SMS) will be sent to the recipients mobile phone alerting them that they have received a new message.

Expiration date*
Deletes the message from the recipients inbox after a selected date, regardless if it has been read or not.

ID control
The message is locked by an extra unique one-time code, which is sent as a text message (SMS) to the receivers mobile phone. ID Control guarantees that only the intended recipient can open it.

Burn after reading*
Deletes the message after it is read.

For your eyes only*
Prevents recipients from sending the message to others.

** Only available for Pro, Business and Enterprise users.
Send Options are paid thru your account using standard text message (SMS) fees.*

Easy to use, anytime anywhere!

– without changing your email address or anything, it just works!

The solution not only protects every individual message, it also protects the whole mail dialogue, over its lifetime. With SecureMailbox you can easily share sensitive information with full control.

Easily integrated with your email platform

By integrating SecureMailbox with your exciting Microsoft or Google email platform you can offer your employees, a secure and compliant collaboration environment not just internally but also for your consultants, project members and partners without infringing on their security.

Data protection in a connected world

The SecureMailbox cloud platform is the first global service that's compliant with both ISO 29100 Privacy framework and the GDPR*.

SecureMailbox and SecureAppbox offer authorities, governments and private corporations a secure and privacy-aware platform; communication freedom, without false trade-offs with usability and productivity.

Easy to use, anytime anywhere – no need to change your email address. It just works!

**EU's new General Data Protection Regulation (GDPR) will replace national data protection laws in 2018*
